

## **Workshop/Instructional Course:**

### **Title:**

PHYSIOLOGICAL INSIGHTS IN SINGING AND SPEAKING

### **Presenter(s):**

Matthias Echternach<sup>1</sup>, Louisa Traser<sup>1</sup>, Bernhard Richter<sup>1</sup>, Michael Burdumy<sup>1</sup>, Claudia Spahn<sup>1</sup>  
<sup>1</sup>Freiburg Institute of Musicians' Medicine, Freiburg University Hospital  
matthias.echternach@uniklinik-freiburg.de

### **Summary:**

During the last years the Freiburg Institute of Musicians' Medicine performed many research projects focusing on singing and speaking voice physiology including new innovative technologies such as dynamic real time MRI. Now, this Institute published a collection of videos demonstrating physiologic items of the singing and speaking voice. This DVD is aimed to provide background material for teaching voice physiology. It should address all specialties dealing with voice, singers, conductors, actors, voice scientists, voice therapists and medical doctors. In this workshop this DVD will be presented.
